DANIEL MARTIN

SOFTWARE ENGINEER

EXPERIENCE

Software Engineer

Valcom | Remote/Roanoke, VA, 24019 | May 2020 - Current

- Built performant API's with various languages/frameworks
- Built efficient front-end's with React & TypeScript
- Discuss issues & progress with team
- Maintained optimal test coverage for front & back end

Software Engineering Intern

JP Morgan & Chase | Remote | November 2019 - December 2019

- Completed Data Visualization tools for clients with TypeScript
- Fixed bugs in legacy code in Python
- Created patch files for bug fixes

PROJECTS

Carpal

React | Redux | Axios | React-Router | Node.js | Express | Jest | JWT | Mapbox
Carpal is a carpooling app that allows you to connect with people nearby to share a common route

8 Developer team project - 4 month build

- Planned & discussed release cycles
- Built core api services with Node.js & tested with Jest/Supertest
- Built front-end using React/Redux/Mapbox & deployed with AWS

Code: <https://bit.ly/3fwFJgM>

Site: <https://www.letscarpal.com/>

Droom

Node | Express | JWT | Bcrypt | Knex | PostgreSQL | Jest | Supertest | Heroku
Droom is a mashup between Tinder and LinkedIn, it helps job seekers find their perfect job, while matching recruiters or companies to them.

Solo Backend project - 2 week build:

- Built entire API with CRUD operations
- Tested using Jest & Supertest
- Wrote detailed documentation
- Deployed API to Heroku

Docs: <https://droom-be.herokuapp.com>

Code: <https://bit.ly/2Vw0F0u>

EDUCATION

Lambda School

2019-Current

Full Stack Web Development & Computer Science
